Michael Dekoschak
Chief of Police

MedicAlert L.E.A.P. (Law Enforcement Agency Portal)

Missing person cases and wandering incidents are a major concern for law enforcement, especially as it relates to the Alzheimer's and Autism communities. 6 out of 10 persons with Alzheimer's will wander or become lost.

The **Hatfield Police Department** is now enrolled in the **MedicAlert L.E.A.P. Program**. Through this program, community members who are at risk for wandering can receive a **FREE** MedicAlert bracelet or pendant. Their health and emergency contact information will be stored with MedicAlert and added to the existing national database.

If a MedicAlert member is found wandering, law enforcement will utilize a phone number located on the jewelry and are provided with medical history and family contact information to ensure the member is safely returned home.
